

Flaporen Lexicon

A norm is a translation of the underlying values of a group or society into concrete rules of conduct and regulations. This can be laid down in rules, written or unwritten. Norms guide social actions because people often unconsciously adapt their behavior to the norms of the situation. The Flaporen Lexicon is a language's inventory that analyses the dutch word 'flaporen' better known as 'stick-out ears'. A collection of fragments of written text about stick-out ears. What are the negative and positive connotations about the dutch word stick-out ears? You will find the history, evolution and relationships between 'flaporen' and judgmental words that leads to a fictional cosmetic ear product.
